Computer Science Student | MERN Stack Developer

Summary

Motivated computer science student with a strong focus on MERN stack development. Experienced in completing multiple projects using MERN stack technologies. Skilled in developing custom APIs and implementing key features and functionalities. Currently pursuing a Bachelor of Science in Computer Science at Dilla University. Completed a MERN Stack Developer course through Evangadi.com. Demonstrates strong problem-solving skills, excellent communication, and a collaborative approach to teamwork.

Education

Bachelor of Science in Computer Science, Dilla University, Ethiopia (Expected Graduation: 2024)

- Scholarship Recipient, Evangadi.com (February 2023)
- Completed MERN Stack Developer course and earned a certificate

Skills

- MERN Stack Development: Proficient in Express.js, MongoDB, React.js, and Node.js. Experienced in working with frameworks and libraries such as Redux for state management and Material-UI for UI components.
- Website Development: Skilled in building dynamic and responsive websites using HTML, CSS, and JavaScript.
- Project Cloning: Experience in cloning projects from companies like Amazon, YouTube, and Apple, replicating their functionalities and designs.
- Strong Problem-Solving Skills: Demonstrated ability to troubleshoot and resolve complex technical issues efficiently.
- Excellent Communication and Teamwork Abilities: Proven track record of effective collaboration within multidisciplinary teams and excellent written and verbal communication skills.

Projects

Evangadi Q&A Website

- Developed a Q&A website similar to Stack Overflow using MERN stack technologies.
- Implemented features such as user registration, login functionality, the ability to ask and answer questions, and upvoting/downvoting system for answers.
- Utilized MySQL for database management, Express.js for server-side applications, React.js for front-end development, and Node.js for server-side scripting.

ABA Garage Website

- Created a dynamic website for ABA Garage, integrating functionalities like user registration, service booking, and payment processing.
- Hosted the website on AWS (Amazon Web Services) for scalability and reliability.
- Developed custom APIs using Express.js and implemented a user-friendly interface using React.js and Bootstrap.
